ABSTRACT

Universal Decimal Classification (UDC) by defecto became a knowledge organisation tool, particularly in S&T libraries all over the world. Like DDC updations and revisions, the UDC has also been revised from time to time and incorporates many new classes and changes in the changing context. The third revised edition of UDC in 2005 has many changes. But unfortunately, the common auxiliaries of places, particularly India and its states, are very inadequate even in the recent published edition of UDC. Hence, classifiers and LIS schools all over the country are facing sever problem in assigning the numbers of newly formed states and districts of India. Therefore, this study is an attempt to provide a solution to the above problem by giving a depth schedule for common auxiliaries of places for Indian states, districts, and historically significant entities.

Keyword: UDC, common auxiliaries of place, India, universal decimal classification

1. INTRODUCTION

The Universal Decimal Classification (UDC) is a system of library classification developed by the Belgian bibliographers Paul Otlet and Henri La Fontaine at the end of the 19th century. It is based on the Dewey Decimal Classification but uses auxiliary signs and symbols to indicate various special aspects of a subject and relationships between subjects. It thus contains a significant number of faceted or analytico-synthetic elements, and is used mainly in specialist libraries where UDC has been modified and extended over many years to cope with the increasing output in all disciplines of human knowledge and is still under continuous review and revision to take account of new developments. The UDC is used worldwide, and has been published in whole or in parts in 39 different languages. India consists of 28 states and seven Union Territories. All states, and the two union territories of Puducherry and the National Capital Territory of Delhi, have elected legislatures and governments patterned on the Westminster model. The other five union territories are directly ruled by the Centre through appointed administrators. In 1956, under the States Reorganisation Act, states were formed on a linguistic basis. Since then, this structure has remained largely unchanged. Each state or union territory is further divided into administrative districts. In India UDC has became a defacto knowledge organising tool, specially in R&D libraries as well as a teaching subject in all the LIS schools in India.

2. WHY THIS STUDY NEEDED?

The UDC since its inception has undergone many changes in context of growth and development, expansion and extension and revision of new classes and knowledge. But the need was felt since a long time for revision and expansion of common auxiliaries of place, particularly for India and its states, as India now is the biggest democracy of the world and second in the use and application of UDC in its libraries. Therefore, the present study is very relevant and would be very useful in providing the depth schedule numbers for India and its states and districts.

3. WHAT IS NEW IN THIS STUDY?

The latest edition of the UDC published in 2005 is the third edition. It only provides common auxiliaries of places of 28 states of India, which is insufficient in fulfilling the exhaustive need of classification.

But this schedule contains more than 700 entries pertaining to all Indian states, union territories and their districts. In addition, schedule also provides number of places of religious, historical and tourists significance

such as Ajanta and Ellora, Amarkantak, Amarnath, Bedagat, Bhilai, Bodh Gaya, Vrindavan, Cherapunjee, Dhariwal, Dwarka, Gangtok, Gulmarg, Kaziranga, Khajuraho, Konark, Mount Abu, Mussoorie, Ooty, Pahalgam, Pathankot, Sarnath, Shantiniketan, Shillong, Shirdi, Srirangapatnam, Tirupati, Vaishnodevi, etc. The researchers firmly believe that this study will not only serve as a tool to provide appropriately allott class number to all the places in India like states districts, UTs of India but also make aware to the world communities to the states, districts and famous places of India.

4. OBJECTIVES OF STUDY

The main objective was to expand the common auxiliaries of places of India and its states. In addition, the study intended to serve the following specific purposes:

- To identify the new Indian states and districts;

- To prepare a base document for common auxiliaries for places of India for UDC;

- To incorporate the newly formed Indian states and districts and allott numbers as per the provision laid down in UDC;

- To assign the auxiliary numbers for sacred, and historical places and places of tourists' significance; and finally

- To prepare an exhaustive index on common auxiliaries for places in India for quick retrieval.

5. SCOPE AND METHODOLOGY

The study covers more than 700 entries on common auxiliaries of places of 28 states and 7 union territories i.e., Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Chandigarh, Chhattisgarh, Dadra and Nagar Haveli, Daman and Diu, Delhi, Goa, Gujarat, Haryana, Himachal Pradesh, Jammu and Kashmir, Jharkhand, Karnataka, Kerala, Lakshdweep, Madhya Pradesh, Maharashtra, Manipur, Meghalaya, Mizoram, Nagaland, Odisha, Puducherry, Punjab, Rajasthan, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh, Uttarakhand, West Bengal. Study also provides the auxiliary numbers of religious, historical, and tourists' significance places such as Ajanta, Amarkantak, Amarnath, Bedagat, Bhilai, Bodh Gaya, Vrindavan, Cherapunjee, Dhariwal, Dwarka, Ellora, Gangtok, Gulmarg, Kaziranga, Khajuraho, Konark, Mount Abu, Mussoorie, Ooty, Pahalgam, Pathankot, Sarnath, Shantiniketan, Shillong, Shirdi, Srirangapatnam, Tirupati, Vaishnodevi, etc.

For developing the schedule following approaches have been adopted:

(a) New states, districts and famous places of religious, tourists' interest, etc., have been taken from the government sources;

(b) The auxiliaries entries of famous places are entered according to Principle of Geographical Continuity;

(c) The schedule is expended strictly on the lines/ principles as laid down in the UDC (3rd IME Edition-2005) so that consistency can be maintained; and

(d) Gap device has been followed for future expansion of the schedule.
