ABSTRACT

As computer usage continues to grow exponentially, the desire of users to use electronic publications (e-publications) has also increased tremendously. This has led to the publication of materials in electronic form as e-publications on both CD-ROMs and web. The electronic book (e-book) is one of the several forms of e-publications and its popularity has been growing steadily for the past decade. This bibliography provides all references of the published literature on e-books and related technologies in one source so that it will save time for others in conducting literature searches and reviewing the developments. The information included in this bibliography is collected systematically from all the published sources in the world such as journal articles, conference papers, conference proceedings, books, reports and PhD theses on e-books until the last quarter of 2011. Mainly, it covers e-books, e-books publishing, the impact of e-books on different types of users, e-book publishing techniques and trends, e-book user interfaces and other technologies related to e-publications. This bibliography will be useful to all researchers conducting research in any areas related to e-books and e-book publishing.

Keywords: Electronicbooks, e-books, bibliographies

1. INTRODUCTION

It is updated version to the earlier version by author published in *The Electronic Library*, Vol. 23 No. 1, 2005, pp. 17-44
