

Multimedia Information Resources Available on Internet in Libraries

Compiled by
Dr CK Ramaiah*

The popularity of the world wide web and the incredible rapid growth of the web technology could not be imagined a decade ago. Web is a globally hyperlinked electronic environment on which a lot of latest information is available in almost all subject areas. Keeping this in mind, an exhaustive information search was conducted on Internet to compile a list of various web sites providing information on the use of multimedia systems for library applications.

This list is organised in four sections which contains selected library related multimedia resources available on the internet. These include full text of the papers presented in conferences; reports, media resources, digital & virtual libraries available on Internet, important multimedia applications, multimedia collections of different libraries, internet-based multimedia library services, etc.

- (1) **Multimedia Digital Libraries:** digital multimedia libraries, digital library services, interactive multimedia online services, etc., available on Internet.
- (2) **Integrating Multimedia into Libraries Management and Access Issues:** issues related to management and access of multimedia digital libraries are listed in this section. Also included several conference reports, papers, internet site address where multimedia links are given, conference lecture presentations and multimedia conferencing applications archives.
- (3) **Instructional Multimedia Resources on Web:** multimedia instructional & training

tools available in or for libraries. The tools for producing multimedia presentations, instructional aids are also given in this section.

- (4) **Selected List of Magazines on Multimedia:** some of the best magazines along with the titles, publishers, frequency, type and the information on the subject coverage. Even though multimedia magazines are available other than English language, here magazines published in English language are listed.

1. Multimedia Digital Libraries

Digital Video Libraries

Speech recognition, image understanding, and natural language processing and applied to the creation of digital video libraries

<http://www.cs.uh.edu/~tai95/stevens.txt.html>

IBM Digital Library Media Archive

<http://www.edu.ibm.com/telmedia/diglib.html>

Internet 2000 for Jack and Jill and Little Joey Internet 2000

The Hampton Roads Central Library. Links to the future, new technology for the 21st Century.

<http://www6.pilot.infi.net/~cwt/inet2000.html>

Digital Library Services

Multimedia collections are available on digital format via the Internet, world wide for your review.

<http://www.weblab.iupui.edu/projects/diglib.html>

Multimedia Resources

<http://www.tme.nl/resource.html>

Multimedia in Libraries

Digital libraries now allow the integration of digital multimedia into repositories, which are not confined to the physical library, but allow access across worldwide networks.

http://concord.cscdc.be/conference/abstract/3_1200_2_1.html

Multimedia Databases and Virtual Libraries

<http://www.cs.concordia.ca/~teaching/comp753/jan97/dharma/node2.html>

Interactive Multimedia On-line Services: The Digital Library Paradigm

Recent developments of the network infrastructures, thousands of information repositories, wide bandwidth data networks and information appliances and advanced communications and information access services.

<http://www.ercim.org/medconf/papers/thanos.html>

The World-Wide Web Virtual Library

Chemistry Rio Grande do Sul, Federal University of (UFRGS), Brazil, Institute of Chemistry. International Organization for Chemical Sciences in Development (IOCD) - supporting chemistry in developing countries.

<http://www.chem.ucla.edu/chempointers.html>

The World Wide Web Virtual Library: Museums

Virtual Library information on libraries and art and history and includes The Computer Clubhouse on-line art galler—an educational outreach program.

<http://www.comlab.ox.ac.uk/archive/other/museums.html>

Issues in Multimedia Digital Libraries

Librarianship issues: access, organisation, cataloguing, user support.

<http://concord.cscdc.be/conference/presentation/3>

Issues in Multimedia Digital Libraries

The MUMLIB—project explicitly examines the user issues surrounding the integration of various media types into a single CD-ROM.

<http://concord.cscdc.be/conference/presentation/>

Online Dharma Collections: Multimedia.

The directory of online collections of multimedia (audio, video, etc) files of Buddhist relevance.

<http://www.dharmanet.org/multimedia.html>

Image and Multimedia Data Resources

Digital Library Project, University of California, Berkeley

<http://sunsite.berkeley.edu/Imaging/Databases/>

2. Integrating Multimedia into Libraries: Management & Access Issues

Integrating Multimedia into Libraries

Paper presented by Cribb, Audiovisual Librarian, University of Queensland. National Library of Australia.

<http://www.nla.gov.au/3/npo/conf/npo95gc.html>

University of Rochester Libraries - Multimedia Center

General information about MMC, copyright guidelines, hours, classes, multimedia classroom staff and the collection of Videos, Music/Scores, software programs, Foreign Languages, etc.

<http://www.lib.rochester.edu/mmc/>

<http://rodent.lib.rochester.edu>

University of Toronto Libraries: Multimedia Collections

Multimedia collections. Yahoo Index: multimedia archives, Pictures, Small collection of archives of multimedia materials. CAS Multi Media Learning Center, Northwestern University.

http://www.library.utoronto.ca/www/resources_multimedia.html

Multimedia in Libraries and Museums

Conference organised by The British Library and Multimedia

Ventures was held at the Business Design Centre in Islington on 22 June 1995

<http://www.hart.bbk.ac.uk/chart/mmlibrpt.html>

Multimedia Technical Libraries: Informedia Digital Library System

(CMU/SEI-95-TR-006) Technical report cost: \$26.40.

*Dr CK Ramaiah is working as a Scientist 'D' and Head of Multimedia Lab in DESIDOC. He was selected for Commonwealth Scholarship to do research in the field of Information Science in UK in the year 1989. He received his Doctoral degree from University of Technology, Loughborough, England in July 1993 on 'Hypertext and Training the Library Information Science Students'. He obtained his BSc from SV University, Tirupati, MSc in Chemistry, from Meerut University and Bachelor & Masters degrees in Library & Information Science from University of Delhi, Delhi.
