Special Issue on Coastal Oceanographic Studies: Modeling and Observations

DRDO

Published by Defence Research & Development Organisation

DEFENCE SCIENCE JOURNAL

A Publication of DRDO

Defence Science Journal is a peer reviewed, bi-monthly, multi-disciplinary defence research journal of the Defence Research & Development Organisation (DRDO), Ministry of Defence, Govt of India, published by the Defence Scientific Information & Documentation Centre, Delhi. It is brought out in the months of January, March, May, July, September, and November. The Journal publishes research papers, review papers, short communications, and research notes in various disciplines of science and technology.

Papers published in the Journal are covered/indexed by-Cambridge Scientific Abstracts, Chemical Abstracts, Embase, Compendex, Geobase, Embiology, Elsevier Biobase, Fluidex, World Textiles, Scopus, Indian Science Abstracts, International Aerospace Abstracts, Science Citation Index, Omnifile Full-text Mega, Omnifile Full-text Select, ProQuest, World News Connection, Google Scholar, Indian Citation Index. Online published papers are assigned with Digital Object Identifier (DOI).

(viii) Thesis/Dissertation

De Roeck, W. Hybrid methodologies for the computational aeroacoustic analysis of confined subsonic flows. Katholieke University, Leuven, Belgium, 2007. (PhD Thesis).

(ix) Personal Communication

Personal communications shall not be listed under references but included in the text itself. The references shall be given as follows:

The number of registered publications under Copyright Clearance Centre (CCC), Salem, USA, now totals approx. 6000,000 titles used by 3,600 publishers (personal communication with CCC), whereas in 1986 there were only 58,000 publications registered from 1,100 publishers.

(For more referencing style, please visit journal's website)

Apart from the above guidelines, the form in which the cited document is published, for example, microfiche, CD-ROM or other electronic medium; and the language of publication if other than English should be indicated in parentheses at the end of the reference. If the

cited document is unpublished, it should be indicated in parentheses at the end of the reference as 'in press' with DOI No.

(g) Tables

Tables should supplement and not duplicate the information contained in the text. They should be explicitly referred to in the text in numerical order with brief titles. Column headings should be brief, bold and the units of measurement should be placed below the headings in parentheses.

Maximum Five (5) Tables are allowed in a manuscript.

(h) Illustrations

All figures (charts, diagrams, line drawings, and photographic images) should be of good quality and submitted both electronic and hard copy originals. Illustrations should be numbered in order of their occurrences in the text with Indo-Arabic numerals and with short descriptive captions. Lettering should be in capital only and remain legible after a reduction of 50-60 per cent. Scanned/photocopied images reproduced poorly should be avoided. Illustrations taken from other publications must be acknowledged. It is the author's responsibility to obtain permission for reprinting such illustrations in *Defence Science Journal*. The preferred format is encapsulated postscript (.eps) for line figures and .tif for halftone figures with minimum resolution of 300 dpi (dots per inch). Colour should be used only where absolutely necessary for understanding of the figure. Colour should not be used for distinguishing data in line diagrams.

Maximum Six (6) figures are allowed in a manuscript.

(i) Symbols/Units

Non-standard abbreviations should be shown in brackets when first mentioned, and should be used whenever the same terms appear again in the text and not in the title and abstract. Usage of metric units is preferred.

(j) Nomenclature

The nomenclature of mathematical symbols and signs used in the text should be given immediately after the keywords. Authors can follow any of the standard units and symbols developed by international agencies in their fields for this purpose.

(k) Special Items

When chemical/mathematical equations are used in papers, these should be legible. The symbols, not covered in nomenclature (or when nomenclature is not given), should be explained immediately after their first usage in the text. Equations should be consecutively numbered in whole numbers in parentheses (for example, (2), (15), (19), etc.) at the right margin. Reference to the equations in the text should be abbreviated as Eqn (1), Eqns (5-7), etc. Complex structural formulae of chemical compounds should be prepared as illustrations. Capital, lower case and Greek letters should be distinguished clearly. Letters which are sometimes confused for one another (for example, O & 0; l & 1; V, v & n; r & p; X, x & °; K, k & k; E & e; etc.) should be clearly distinguished. A Greek letter should be spelt out in margin where it is first used.

(l) Proofs and Complimentary Journal

The final proof of the paper will be sent for correction in three working days to the author for clearance before printing. All the author(s) will be supplied with a softcopy of issue, free of charge. Author will receive one printed copy of the issue as complimentary.

INSTRUCTIONS FOR CONTRIBUTORS

Objective

Defence Science Journal, a bi-monthly Journal of the Defence Research & Development Organisation (DRDO), publishes original research papers having a direct bearing on Military/Defence applications. It covers natural science, technology, and engineering.

(a) Typescript Requirements

Research papers (max length: 4000 words or 10 typed pages of A4 size including figures) containing original research findings in a clear and concise manner. Papers reporting theoretical, laboratory and field test results are also accepted.

Review articles (max length: 6000 words or 20 typed pages of A4 size including figures) are expected to cover survey, integrate, and critically examine new information accumulated in recent years in a particular subject field. Review articles from subject experts are also commissioned by the Editor.

Short communications/research notes/scientific correspondence (Max length: 2000 words or 8 typed pages including figures) are normally brief reports or technical notes on the progress of ongoing research and/or an application.

(b) Refereeing Process

Papers received for publication are to be peer reviewed by a panel or research experts.

(c) Submission of Typescripts

Typescript should be neatly typed in single space on one side of the A4 size (210 mm x 297 mm) paper, with a margin not less than 40 mm on the left side. It should include: (i) title page with a running (short) title, (ii) abstract, (iii) keywords, (iv) nomenclature of symbols used, (v) tables/figures/illustrations typed/drawn on separate sheets along with their captions in serial order as these appear in text, and (vi) a separate list of figure captions. The reporting in the paper should be in third person.

Manuscripts should be submitted online at: <https://publications.drdo.gov.in/ojs/index.php/dsj/login> in MS Word format. In case of problems in uploading, a copy can be sent at dsj.desidoc@gov.in

Authors may furnish the following certificate at the time of submission of manuscript along with covering letter.

[This is to certify that the reported work in the paper entitled "....." submitted for publication in the Defence Science Journal is an original one and has not been submitted for publication elsewhere. I/we certify that citations to the previously reported works have been given and no data/tables/figures have been quoted verbatim from the other publications without giving due acknowledgement and without permission of the author(s). The consent of all the authors of this paper has been obtained before submitting.]

[Signatures and names of all the authors]

(d) Title Page

The title page should include: title of the article, name(s) of author(s) and affiliation(s); complete address (including telephone/fax numbers, e-mail address) of the author (in case of a single author paper) or the contact person (in the case of a Co-authored paper) to whom communications should be sent. It should also include a short title not more than 50 characters to be used as running title. The titles should be brief, clear and provide a broad introduction of the paper.

(e) Abstract and Keywords

An abstract of about 200 words for research papers, 150 words for review articles, and about 100 words for research notes and short communications should be provided. Appropriate keywords should be given where necessary.

(f) References

References to already published literature should be numbered consecutively in order of their citation in the text and placed at the end of the text. In the text these should be indicated by superscripts (number placed above the line)⁽¹⁾. References to personal communication should not be placed under references, but cited in the text in the parentheses. A reference should be listed only once. Use of *ibid.*, *idem.*, *op.cit.*, should be avoided. An already cited reference when repeated, should be given in parentheses (for example, ref. 5, p. 79; ref. 15, p. 193; etc). Explanatory material may be given as an Appendix.

Defence Science Journal Style uses **Vancouver Reference Style** when referring to a source of information within the text of a document. In its simplest form, a citation is given in the text, consisting of a number in superscript. Examples of citations in different types of documents are given as follows:

(i) Journal Article

Rao MVG, Ratnam DV. Faster acquisition tech-nique for software-defined GPS receivers. *Def Sci J*. 2015;65(1):5–11. doi: 10.14429/dsj.65.5579

Xu F, Yan H, Chen J, Zhang Z, Fan C. Nanoscale Co3O4 powders prepared by an enhanced solid-state reaction method. *Ceramics International*. 2020;46(9):13893–9.

Standard abbreviations as per the International Serials Catalogue of the International Council of Scientific Unions–Abstracting Board (ICSU–AB) should be used for the titles of journals. However, single and double worded journal titles (for example, *Nature*, *Science*, *Scientific American*) should be given in full.

Electronic sources should include the URL and date of access.

Wang ZJ, Birch JM, Dickinson MH. Unsteady forc-es and flows in low Reynolds number hovering flight: two-dimensional computations vs robotic wing experiments. *Journal of Experimental Biology*. 2004 Jan 22;207(3):449–60.
